/work	2175 → 2175	4254 → 4254

1 · Palette: black, gold and paper, no blue

- Blue (cyan) anywhere on the 7 pages at both sizes, by computed colour, background and borders: 0 elements. Person inks (--ashan*, --jordan*, .c-a/.c-j, rule-a/j) are gone from the CSS and markup.
- Hero names: first rgb(22, 19, 15), last rgb(22, 19, 15) (the heading black). “&”: rgb(190, 150, 69) → rgb(168, 128, 47) → rgb(135, 97, 34), fallback rgb(168, 128, 47).
- Picked: the band under the first name is gold (color(srgb 0.658824 0.501961 0.184314 / 0.26), 100% 64.5867px); the line under the hint names “Ashan.” in rgb(135, 97, 34) (4.95:1 on the paper), the same for both.
- Contact: “Tell us what’s going on.” rgb(22, 19, 15); send button linear-gradient(rgb(160, 122, 46), rgb(135, 97, 34) 50%, rgb(114, 83, 27)) (solid rgb(135, 97, 34) where gradients can't paint), text rgb(244, 241, 234): 4.95:1 at the middle, where the text is. The hero's button stays black.
- The two rings, both gold and linked as before, in the header and footer mark, every favicon size, the touch icons and the cursor (next page).

2 · Last names, mirrored

- Desktop 1440: Fernando's F starts 0.00px from Ashan's A (ink to ink); Lopez's z ends -0.01px from Jordan's n. Last names 700 36.5px Cormorant Garamond. Buttons named “Ashan Fernando” 1, “Jordan Lopez” 1.
- Phone 390: Fernando's F starts 0.00px from Ashan's A (ink to ink); Lopez's z ends -0.01px from Jordan's n. Last names 700 26.4px Cormorant Garamond. Buttons named “Ashan Fernando” 1, “Jordan Lopez” 1.
- Measured from the fonts: A (500) starts -.0047em before its box, F (700) .031em into its; n (500) ends .0173em, z (700) .026em short of theirs. Also checked at 1280, 1920, 768 and 360: within 0.03px.

3 · Header

- Desktop 1440: at rest names hidden, opacity 0, black layer rgb(22, 19, 15) at 0, links rgb(22, 19, 15). Past the names: black (rgb(22, 19, 15) at 1, top corners 20px), names visible, opacity 1 in rgb(244, 241, 234), “&” gold gradient, links rgb(244, 241, 234), at top 0. Transitions (motion on): color 0.25s, border-color 0.25s; black layer opacity 0.25s; names opacity 0.25s.
- Phone 390: at rest names hidden, opacity 0, black layer rgb(22, 19, 15) at 0, links rgb(22, 19, 15). Scrolling on down: steps aside (top -86). Back up a little: black (rgb(22, 19, 15) at 1, top corners 14px), names visible, opacity 1 in rgb(244, 241, 234), “&” gold gradient, links rgb(244, 241, 234), at top 0. Transitions (motion on): color 0.25s, border-color 0.25s; black layer opacity 0.25s; names opacity 0.25s.
- It turns black once the names' bottom edge has gone under it (on other pages, the page's h1) and back on the way up. Hidden, the names are out of the tab order. The black has the panel's top corners; under them the header's own paper, never the page.

4 · Panel

- Shadow, desktop: rgba(28, 28, 30, 0.2) 0px 0px 80px -20px, rgba(28, 28, 30, 0.14) 0px 32px 120px -24px, rgba(28, 28, 30, 0.07) 0px 48px 260px 0px. Phone: rgba(28, 28, 30, 0.2) 0px 0px 40px -10px, rgba(28, 28, 30, 0.14) 0px 16px 60px -12px, rgba(28, 28, 30, 0.07) 0px 24px 130px 0px. Twice the opacity of before, plus a wider ambient layer.
- Desktop 1440, brightness every 2 CSS px from the screen edge in: left: 239 240 239 238 236 235 235 234 232 232 230 229 230 228 227 228 228 230 231 233 237 238 240 240 … (paper 240; lowest 227, 13 under the paper, at the panel's edge); right: 238 238 238 235 236 234 234 232 231 230 229 230 227 227 227 226 228 230 233 237 238 240 240 … (paper 240; lowest 226, 14 under the paper, at the panel's edge).
- Phone 390, brightness every 2 CSS px from the screen edge in: left: 243 242 239 238 236 233 233 231 233 235 239 240 240 … (paper 240; lowest 231, 9 under the paper, at the panel's edge); right: 239 237 236 234 231 229 229 231 234 238 240 240 … (paper 240; lowest 229, 11 under the paper, at the panel's edge).
- The darkest point is the panel's own edge: a soft shadow that falls away outwards and fades into the paper over the feathered band, not a line (close-ups on the panel page).

5 · Contact form

- “Who should get back to you?” and its picker: 0 elements. In its place: “Ashan and Jordan will get back to you soon.”. Fields sent: name, business, contact, message, website, source, plus startedAt (no who). /api/lead untouched; it still accepts a who from anything that sends one.

6 · Services

- Home cards link to /services/websites-and-getting-found, /services/photo-and-video, /services/phones-booking-follow-up, /services/custom-tools; the whole card is the link. /services rows link the same way, each with an empty preview plate (4).
- Service pages: websites-and-getting-found “Websites & getting found.”, 5 steps, 2 work placeholders; photo-and-video “Photo & video.”, 2 steps, 2 work placeholders; phones-booking-follow-up “Phones, booking & follow-up.”, 3 steps, 2 work placeholders; custom-tools “Custom tools.”, 3 steps, 2 work placeholders.
- Old /services/:slug catch-all removed. V3's four service slugs now go to the service that took their place: /services/websites → 308 /services/websites-and-getting-found; /services/ai-receptionist → 308 /services/phones-booking-follow-up; /services/booking-systems → 308 /services/phones-booking-follow-up; /services/sales-intelligence → 308 /services/custom-tools; /services/nope → 404.

7 · Intro

- Desktop 1440: definition Cormorant Garamond 500 27.0px, 3 lines, 412px wide (32.0ch). Hold until 4000 ms (was 3000), then the flight, 4000–4600 ms. At 4133 ms: 1.69× the wordmark's size, logo 1, wordmark 0. At 4276 ms: 1.13×, logo 0.4, wordmark 0.28. Landed, 4759 ms: logo 0, wordmark 1, off the header's wordmark by x/y/width 0 / 0 / 0 px; the intro handed over to the hero at 4710 ms (700 ms into the dissolve), so its entrance has just begun under the clearing mist.
- Phone 390: definition Cormorant Garamond 500 21.0px, 3 lines, 321px wide (32.0ch). Hold until 4000 ms (was 3000), then the flight, 4000–4600 ms. At 4127 ms: 1.5× the wordmark's size, logo 1, wordmark 0. At 4261 ms: 1.11×, logo 0.48, wordmark 0.21. Landed, 4768 ms: logo 0, wordmark 1, off the header's wordmark by x/y/width 0 / 0 / 0 px; the intro handed over to the hero at 4720 ms (700 ms into the dissolve), so its entrance has just begun under the clearing mist.
- Reduced motion: no flight, the overlay fades as before. ?intro, the smoke under the mouse, and skip on click, tap, key or scroll unchanged.

8 · Hero entrance

- Desktop 1440: & 0–356 ms; Ashan Fernando 300–800; Jordan Lopez 870–1370; nib 300–800, 300–800, 870–1370, 870–1370; hint and lede 1440–1840; button 1500–1900; all done by 1900 ms.
- Phone 390: & 0–356 ms; Ashan Fernando 300–800; Jordan Lopez 870–1370; nib 300–800, 300–800, 870–1370, 870–1370; hint and lede 1440–1840; button 1500–1900; all done by 1900 ms.
- Reduced motion: hero opacities 1/1/1/1/1, 0 animations. Without scripting: .name 1, .name-amp 1, .hint 1, .lede 1, .hero > .act 1. The names are in the page from the start; the entrance only clips and fades them, so nothing moves.
- Console errors during capture: none.

Fernando Lopez

PICK A NAME TO SEE WHAT EACH OF US DOES

We build the website, shoot the photos and video, and set up the phone answering and booking behind it, for local businesses around the Bay. The two of us do every project ourselves.

TELL US WHAT'S GOING ON

US

The two people on the first call are the two people doing the work.

Based in the Bay Area.

No account managers, no handoffs, nothing farmed out.

We come to you for the shoot.

You own the site, the domain and the data from day one.

A

ASHAN

Ashan. Decides how it looks and how it should feel to use. Plans the shoot and the posts. Then tries to break the site before your customers can.

J

JORDAN

Jordan. Builds it: the site, the booking, the phone answering and the follow-up behind it. Shoots the photos and video.

WHAT WE DO

Websites & getting found.

The site itself, and the work that gets it found on Google and in AI search like ChatGPT, so people can call, book or buy.

Photo & video.

Your place, your people and your work, shot on location and cut for your site, Google and your posts.

Phones, booking & follow-up.

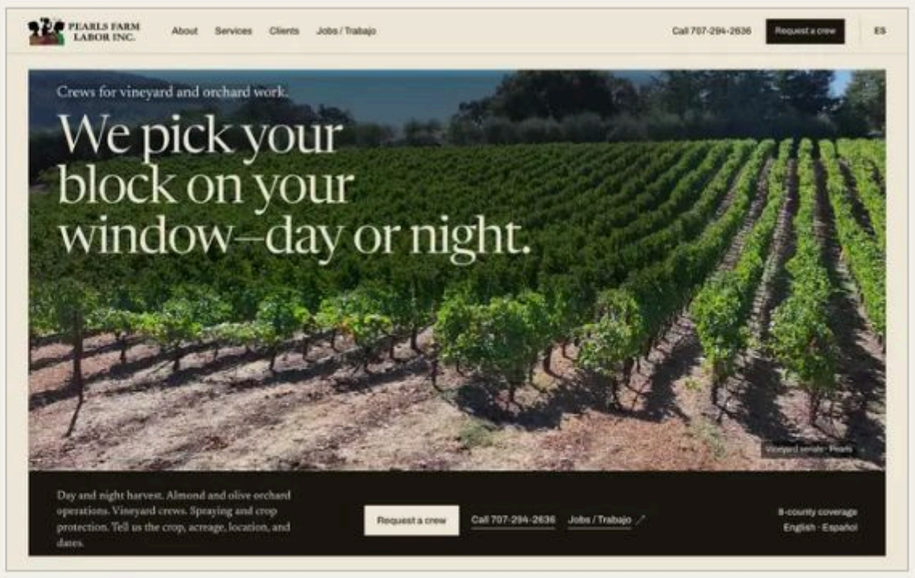

A line that answers when you can't, booking that fills the calendar, and follow-up that goes out on its own.

Custom tools.

When the problem is particular to your business, we build the tool for it, around how you already work.

WHAT WE DO

Websites & getting found.

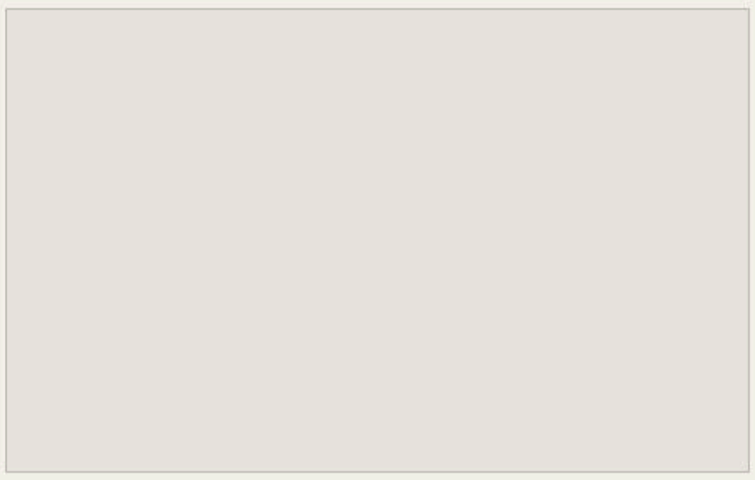

The site itself, and the work that gets it found on Google and in AI search like ChatGPT, so people can call, book or buy.

- Designed around how your customers call, book or buy, on your own domain
- Search done properly: your Google listing, local SEO and the pages behind them
- Set up to show up in AI search, when people ask ChatGPT who to call
- Kept up every month, with what it brings in tracked

Photo & video.

Your place, your people and your work, shot on location and cut for your site, Google and your posts.

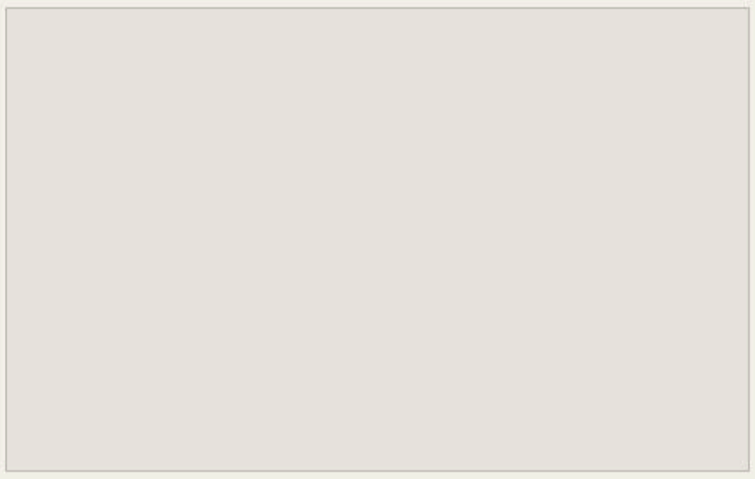

- We come to you for the shoot
- Photos and short video cut for your site, Google and Instagram
- New content every month, so your pages don't go stale

Phones, booking & follow-up.

- A line that answers when you can't and books the appointment
- Booking tied into how you already schedule

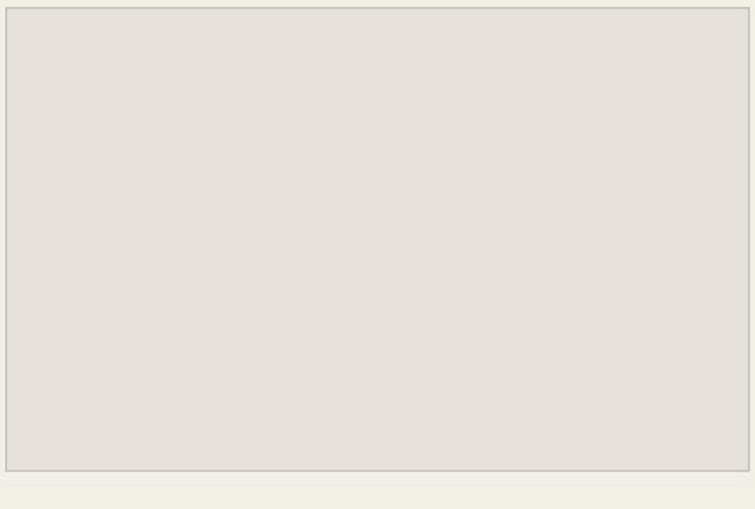

A line that answers when you can't, booking that fills the calendar, and follow-up that goes out on its own.

- Reminders and follow-up texts that go out without anyone having to remember

Custom tools.

When the problem is particular to your business, we build the tool for it, around how you already work.

- Built for one problem in your business, not a generic app
- Fits the tools and records you already use
- Tested with your team before anyone relies on it
- Looked after once it's live, and changed as you change

How it starts

1

A 30-minute call.

You tell us where it's going wrong, in your words.

2

A one-page plan.

What we'd fix first and what it costs, sent by the day we say.

3

The shoot and the build.

The two of us, start to finish.

There are no prices on this site. Every business is different, so your price comes in your plan, after the call.

TELL US WHAT'S GOING ON

Desktop 1440 — /services (full page) 3/3 · y 3400–3515

SERVICES

Websites & getting found.

People find a local business three ways now: a Google search, the map, or asking an AI like ChatGPT. We build the site and do the work behind it so you show up in all three, and so whoever finds you can call, book or buy without hunting for how.

Designed around how your customers call, book or buy, on your own domain	Search done properly: your Google listing, local SEO and the pages behind them	Set up to show up in AI search, when people ask ChatGPT who to call	Kept up every month, with what it brings in tracked

WHAT WE DO

01 THE SITE

A site built around how your customers call, book or buy.

We start from what people come to you for and what they do next, and design the pages around that. Fast on phones, on your own domain, and yours: the site, the domain and the data are in your name from day one.

02 GOOGLE

Showing up on Google and on the map.

Your Google listing set up and kept current: hours, photos, services, replies to reviews. On the site, local search done properly: a clear page for each thing you do and each place you do it, so Google knows when to show you.

03 AI SEARCH

Showing up when people ask ChatGPT.

More people now ask an AI who to call. Its answers come from what the web says about

you, so we make sure your site says plainly what you do, where and for whom, and that your listings everywhere else agree with it.

04 FOUND, CALLED, BOOKED

From the search to the booking, with nothing in the way.

Being found only counts once it turns into a call or a booking. Tap to call and book sit where people look for them, and every call and form is tracked, so you can see where each customer came from.

05 EVERY MONTH

Kept up, not handed off and forgotten.

We stay on it every month: new pages and photos as the business changes, search checked and tuned, and what came in, and from where, where you can see it.

SERVICES

Photo & video.

Real photos of your place and your people do more than stock ever will. We come to you, shoot, and cut it for everywhere it’s going.

We come to you for the shoot	Photos and short video cut for your site, Google and Instagram	New content every month, so your pages don’t go stale

WHAT WE DO

01 THE SHOOT

We come to you.

A plan first, so the day goes quickly: what we need, where and who. Then we shoot on location, around how your business runs, not the other way round.

02 THE CUT

Cut for everywhere it’s going.

Photos and short video sized and cut for your site, your Google listing and your posts, and new content every month so nothing goes stale.

SERVICES

Phones, booking & follow-up.

A missed call or a forgotten follow-up is a customer you already did the work to get. We set up what catches them, around how you already work.

A line that answers when you can’t and books the appointment	Booking tied into how you already schedule	Reminders and follow-up texts that go out without anyone having to remember

WHAT WE DO

01 ANSWERING

A line that answers when you can’t.

When you’re with a customer or closed for the day, calls still get answered: questions handled, details taken, and the appointment booked or passed to you.

02 BOOKING

Booking that fills the calendar.

Online booking tied into how you already schedule, so nothing gets booked twice and nobody has to copy anything across.

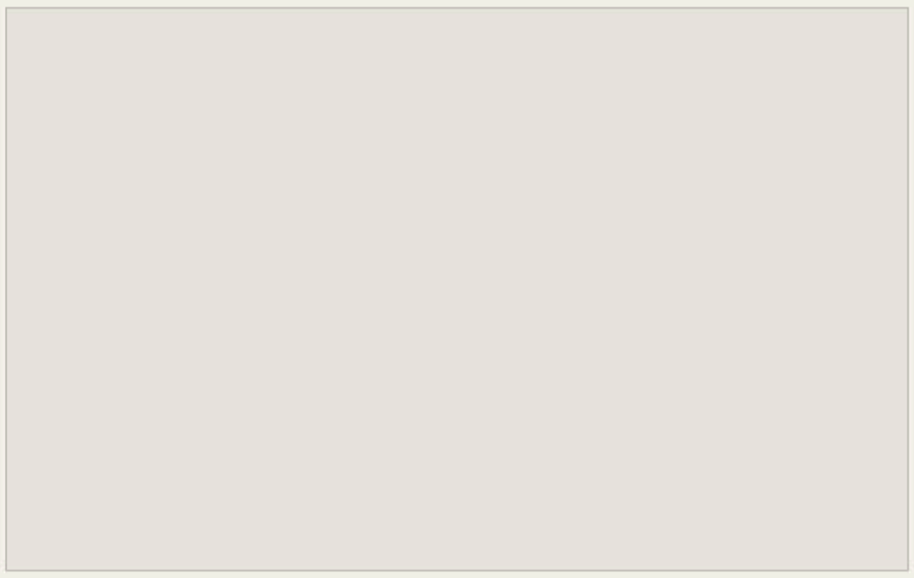

03 FOLLOW-UP

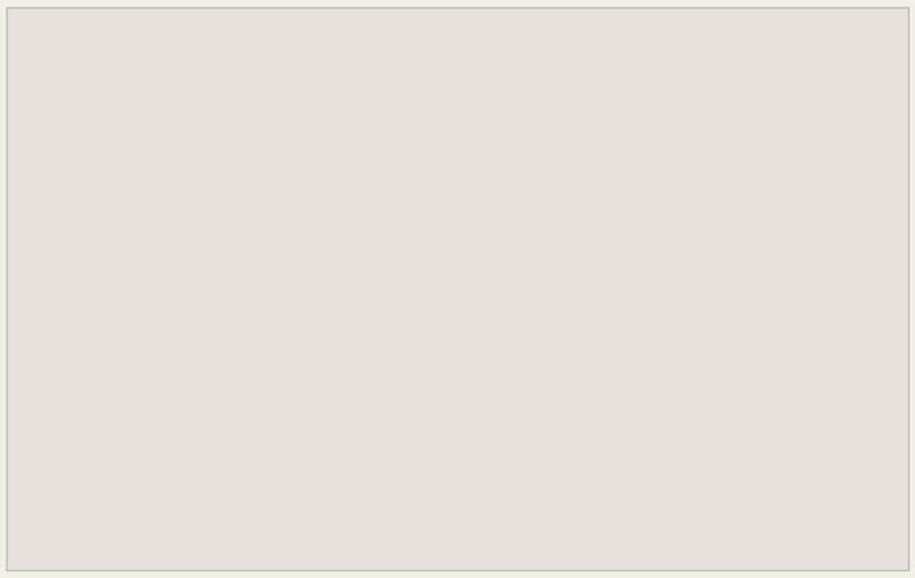

Follow-up that goes out on its own.

A reminder before the visit, a thank-you and a review request after, and a nudge for anyone who went quiet. Written in your voice, and sent without anyone having to remember.

SERVICES

Custom tools.

Some problems no app off the shelf will solve, because they're particular to how you work. For those, we build the tool ourselves.

Built for one problem in your business, not a generic app	Fits the tools and records you already use	Tested with your team before anyone relies on it	Looked after once it's live, and changed as you change

WHAT WE DO

01 THE PROBLEM

We start with what eats your week.

We sit with you and the people doing the work, and find the one job that costs the most time or goes wrong most often.

02 THE BUILD

A tool built for that, and only that.

Made around the tools and records you already use, and tested with your team on real work before anyone relies on it.

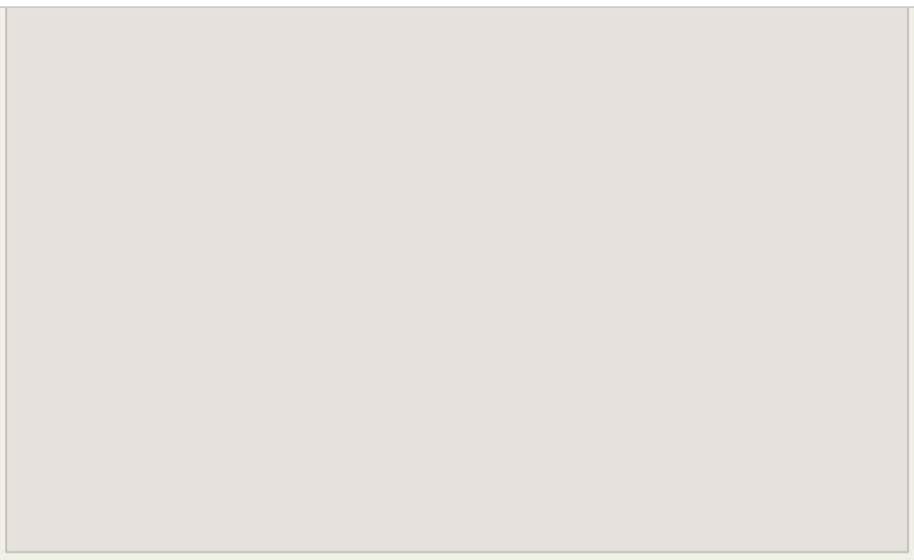

03 AFTER LAUNCH

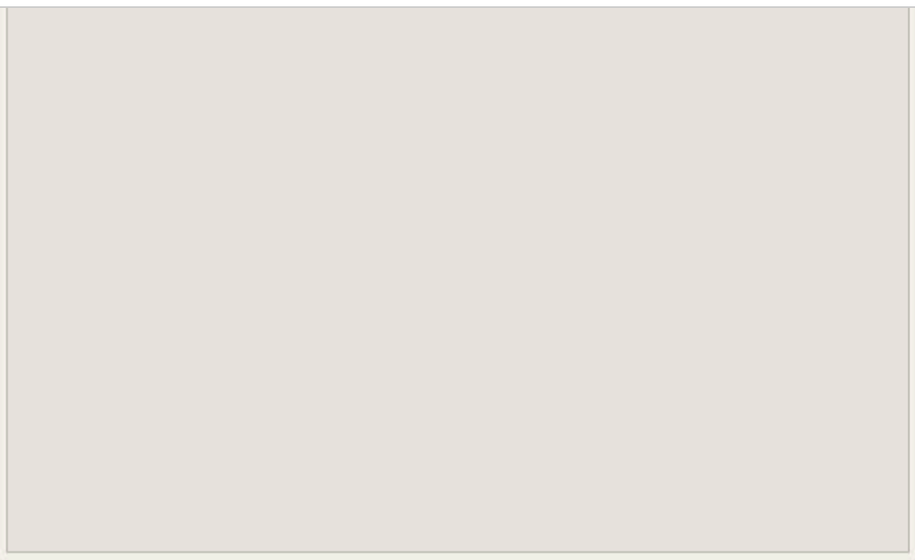

It keeps working as you change.

We look after it once it's live, fix what needs fixing, and change it as your business does.

A line that answers when you can't and books the appointment

Booking tied into how you already schedule

Reminders and follow-up texts that go out without anyone having to remember

Custom tools.

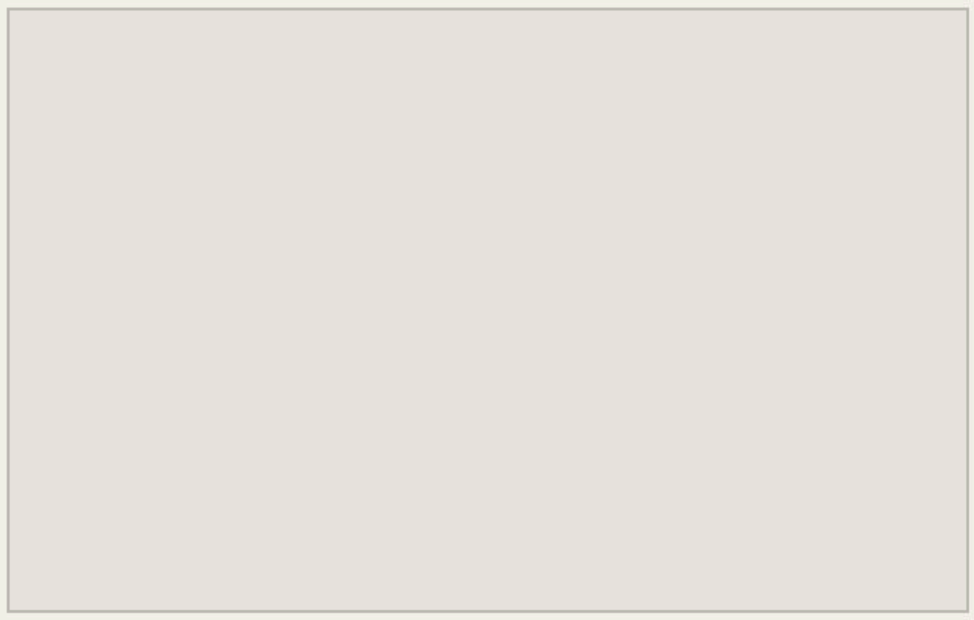

When the problem is particular to your business, we build the tool for it, around how you already work.

Built for one problem in your business, not a generic app

Fits the tools and records you already use

Tested with your team before anyone relies on it

Looked after once it's live, and changed as you change

How it starts

1

A 30-minute call.

You tell us where it's going wrong, in your words.

2

A one-page plan.

What we'd fix first and what it costs, sent by the day we say.

3

The shoot and the build.

The two of us, start to finish.

There are no prices on this site. Every business is different, so your

Every business is different, so your price comes in your plan, after the call.

US WHAT WE DO WORK CONTACT

SERVICES

Websites & getting found.

People find a local business three ways now: a Google search, the map, or asking an AI like ChatGPT. We build the site and do the work behind it so you show up in all three, and so whoever finds you can call, book or buy without hunting for how.

Designed around how your customers call, book or buy, on your own domain

Search done properly: your Google listing, local SEO and the pages behind them

Set up to show up in AI search, when people ask ChatGPT who to call

Kept up every month, with what it brings in tracked

WHAT WE DO

01 THE SITE

A site built around how your customers call, book or buy.

We start from what people come to you for and what they do next, and design the pages around that. Fast on phones, on your own domain, and yours: the site, the domain and the data are in your name from day one.

02 GOOGLE

Showing up on Google and on the map.

Your Google listing set up and kept current: hours, photos, services, replies to reviews. On the site, local search done properly: a clear page for each thing you do and each place you do it, so Google knows when to show you.

03 AI SEARCH

Showing up when people ask ChatGPT.

More people now ask an AI who to call. Its

answers come from what the web says about you, so we make sure your site says plainly what you do, where and for whom, and that your listings everywhere else agree with it.

---

04 FOUND, CALLED, BOOKED

From the search to the booking, with nothing in the way.

Being found only counts once it turns into a call or a booking. Tap to call and book sit where people look for them, and every call and form is tracked, so you can see where each customer came from.

---

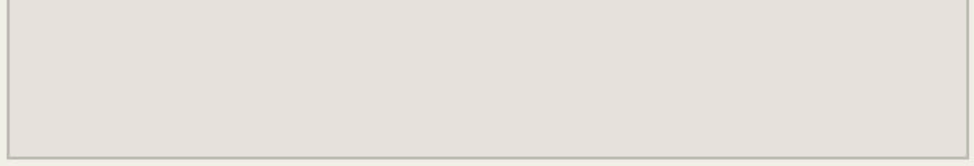

05 EVERY MONTH

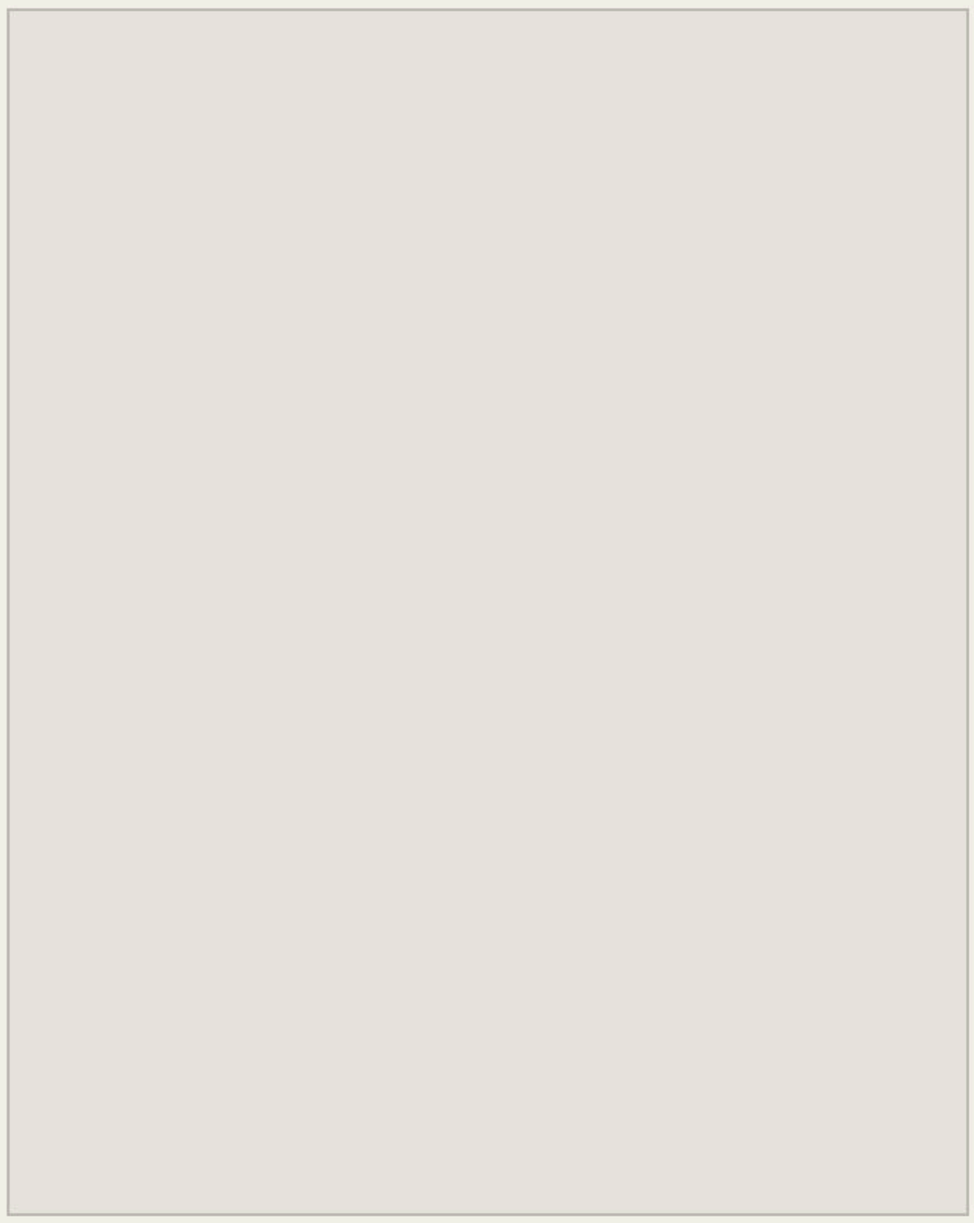

Kept up, not handed off and forgotten.

We stay on it every month: new pages and photos as the business changes, search checked and tuned, and what came in, and from where, where you can see it.

US WHAT WE DO WORK CONTACT

SERVICES

Photo & video.

Real photos of your place and your people do more than stock ever will. We come to you, shoot, and cut it for everywhere it’s going.

We come to you for the shoot

Photos and short video cut for your site, Google and Instagram

New content every month, so your pages don’t go stale

WHAT WE DO

01 THE SHOOT

We come to you.

A plan first, so the day goes quickly: what we need, where and who. Then we shoot on location, around how your business runs, not the other way round.

02 THE CUT

Cut for everywhere it’s going.

Photos and short video sized and cut for your site, your Google listing and your posts, and new content every month so nothing goes stale.

US WHAT WE DO WORK CONTACT

SERVICES

Phones, booking & follow-up.

A missed call or a forgotten follow-up is a customer you already did the work to get. We set up what catches them, around how you already work.

A line that answers when you can’t and books the appointment

Booking tied into how you already schedule

Reminders and follow-up texts that go out without anyone having to remember

01 ANSWERING

A line that answers when you can’t.

When you’re with a customer or closed for the day, calls still get answered: questions handled, details taken, and the appointment booked or passed to you.

02 BOOKING

Booking that fills the calendar.

Online booking tied into how you already schedule, so nothing gets booked twice and nobody has to copy anything across.

03 FOLLOW-UP

Follow-up that goes out on its own.

A reminder before the visit, a thank-you and a review request after, and a nudge for anyone who went quiet. Written in your voice, and sent without anyone having to remember.

SERVICES

Custom tools.

Some problems no app off the shelf will solve, because they're particular to how you work. For those, we build the tool ourselves.

Built for one problem in your business, not a generic app

Fits the tools and records you already use

Tested with your team before anyone relies on it

Looked after once it's live, and changed as you change

WHAT WE DO

01 THE PROBLEM

We start with what eats your week.

We sit with you and the people doing the work, and find the one job that costs the most time or goes wrong most often.

02 THE BUILD

A tool built for that, and only that.

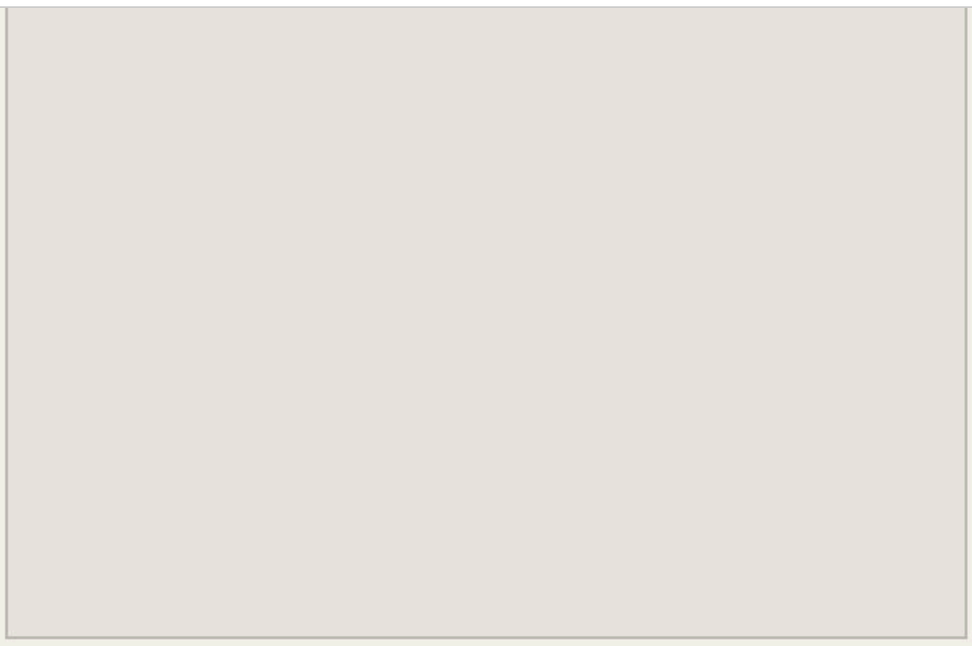

Made around the tools and records you already use, and tested with your team on real work before anyone relies on it.

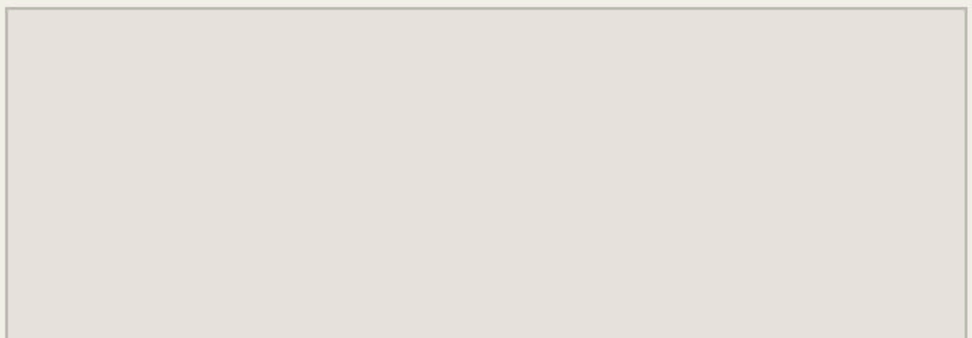

03 AFTER LAUNCH

It keeps working as you change.

We look after it once it's live, fix what needs fixing, and change it as your business does.
